Current Review Answered

Review Question

Test Summary

Pre-course assessment

- There are 30 questions in the pre course evaluation. All questions are multiple choice and mainly have one correct answer. Where more than one answer maybe correct the question will usually say either 'choose X number of options' or 'tick all that apply'.
- The questions are in a logical sequence covering the oesophagus, endoscopy and the stomach though you can move around the test and review your answers.
- You will need to complete the questions in the pre course assessment before you can proceed to module 1 of the Upper Gi course.

Pre course assessment

Please ensure you mark the welcome video as complete and you take the pre-course assessment.

The classroom elements of the course will be presented on two platforms.

See separate instructions in the material section of the lesson pages

Course progress

Course

Your progress is monitored at all times and is displayed both at course and module level

Assignment scoring rubrik

	POOR (1)	AVERAGE (2)	GOOD (3)	EXCELLENT (4)
CONTENT	The content is unclear, and any analysis is either absent or vague.	The content is at times clear, but at other times less clear, and analysis and relevance of the content is generally vague.	Information provides reasonable support for the purpose of the assignment and displays a sound basic analysis of the topic.	The content is clear, relevant and supports the purpose of the assignment. Demonstrates a thoughtful analysis of the topic.
ORGANISATION	The writing is not logically arranged to respond to the question. Difficult to follow the line of reasoning.	Overall, ideas are presented logically but at times the flow of the assignment lacks clarity	The ideas are presented well, and for the most part the reader can follow the ideas and content easily	The ideas are arranged logically, and flow smoothly throughout the assignment
REFERENCES	There are no references within the assignment	References are present but are not documented in the specified style.	References may contain some errors, or choice of reference may be less appropriate for the assignment	References are appropriate for the assignment and documented correctly.

Completing 'Virtual clinic' case studies

1 Upper GI Tract Course

The patient with persistent dyspepsia

Virtual clinics are usually case based scenarios and take the form of step by step by step questions and answers.

You can re run the Virtual Clinic as many times as you need to

Read the introduction then click
